Progressive muscle relaxation

Relaxing muscles can help you relieve stress and tension, feel more comfortable, and even sleep better. To prepare for muscle relaxation exercises:

- Make sure you have at least 15 minutes to practice so you don’t feel rushed.
- Sit or lie down comfortably.
- Find a quiet place where no one will disturb you.
- Choose a time when you’re calm so it’s easier to practice. You can do the exercises anytime, not just when you feel uncomfortable.
- Be ready to try each exercise for 10 seconds and then relax for 20 seconds.
- Think about tightening your muscles and relaxing them.

Muscle relaxation exercises for kids 2 to 10 years old

- **Hands and arms:** Pretend you are squeezing a whole lemon in your left hand. Squeeze it hard. Try to squeeze all the juice out. Feel the tightness in your hand and arm as you squeeze. Now let go of the lemon and relax. Notice how much better your hand and arm feel when they are relaxed. Repeat with the other hand.

- **Arms and shoulders:** Pretend you are a lazy kitten who wants to stretch. Stretch your arms way out in front of you. Raise them up as high as you can over your head and lean way back. Feel the stretch in your arms and shoulders. Now really stretch, as far as you can. Let your arms fall down to your sides. Start the stretch again.

- **Shoulders and neck:** Pretend you are a turtle, sitting in the sun. It’s nice and warm and quiet. Uh-oh. You hear something. You’d better pull your head into your shell just to be safe. Pull your shoulders way up to your ears, and push your head down to your chest. Stay in your shell, nice and snug. Now stretch back out into the relaxing sunlight. Pretend you hear another noise, and practice getting back into your shell again.

- **Jaw:** You have a huge piece of bubble gum in your mouth, and it’s really hard to chew. Bite down on it hard! Let your neck muscles help you. Now just relax and let your mouth hang loose. Notice how good it feels to just let your mouth drop. Take another bite. Repeat.

- **Face and nose:** Here comes a pesky fly, landing right on your nose. Try to get him off without using your hands. Wrinkle up your nose. Make as many wrinkles as you can. Scrunch your nose right up. Good, he is going away! You can relax your nose. Oops, he is coming back again. Repeat.
• **Stomach:** Here comes a cute baby elephant. He’s not watching where he is going. He doesn’t see you relaxing there, and he’s going to step on your stomach. Don’t move, just get ready for him. Make your stomach very hard. Tighten up your belly really, really tight. Hold it. Whew! Looks like he missed you, so you can let your belly relax now. Make it really soft. That feels so much better. Get ready, here he comes again! Repeat.

• **Legs and feet:** Pretend you are barefoot and your feet are in a big, fat pot of mud. Squish your toes down deep in the mud. Try to stretch your feet all the way to the bottom of the bucket. Spread out your toes and feel the mud squish between them. Really stretch! Now just let them relax, and let your toes go loose. Feel how nice that is. Repeat.

**Muscle relaxation exercises for kids 11 to 18 years old**

Read and do the following muscle relaxation exercises. Tighten (or think about tightening) muscles for 10 seconds and then relax for 20 seconds before repeating or going to the next exercise.

• **Upper and lower arms:** Bring both arms to your shoulders, as if making a muscle. Make a fist with each hand.

• **Legs and thighs:** Straighten your legs and raise your feet off the ground. Flex your toes towards your knees, tensing the muscles in your calves and thighs.

• **Shoulders:** Push your shoulders up towards your ears, as if shrugging your shoulders.

• **Neck:** Press your head tightly backward against the chair, couch, or bed. You might also try rolling your head around on your neck slowly in one direction and then the next direction. Pay attention to any tension in either direction.

• **Lips:** Press your lips together tightly, as if you’ve just put lip balm on. You might also try puckering your lips, like a kiss.

• **Jaw:** Clench your teeth (not too tightly) or open your mouth wide.

• **Eyes:** Close your eyes somewhat tightly.

• **Forehead:** Raise your eyebrows upward so your forehead wrinkles.

Repeat the exercise for each muscle group at least once. You can repeat the exercises several times for muscles that are harder to relax.

**How can I make muscle relaxation exercises easier?**

The following tips can make it easier to do muscle relaxation exercises:

• Practice several times a day or at night before falling asleep. The exercises will become easier with time.

• Try the exercises when you’re feeling OK. You may begin doing the exercises automatically after a while when you’re stressed or feeling pain.

• Let go of tension when you’re relaxing your muscles. You can also visualize your muscles as warm or heavy.
