

# PREVENTIVE CARE RECOMMENDATIONS PEDIATRIC AGES 0-10

## UDOH NEWBORN SCREENING GUIDELINES

### Utah Department of Health Newborn Hearing Screening Guidelines

\*Parents of infants who pass the screening at any stage should receive information about hearing, speech, and language milestones and information regarding risk indicators for progressive or delayed onset hearing loss. Infants at risk should have their hearing screened every 6 months until 3 years of age.

#### \*RISK FACTORS FOR PROGRESSIVE OR DELAYED ONSET HEARING LOSS

- ~ Parental concern
- ~ Positive family history of hearing loss
- ~ Syndromes known to include hearing loss
- ~ Mechanical ventilation at birth
- ~ Postnatal infections associated with hearing loss
- ~ Head trauma
- ~ Neurodegenerative disorders
- ~ Pulmonary hypertension
- ~ ECMO
- ~ Recurrent otitis media
- ~ Hyperbilirubinemia requiring exchange transfusion
- ~ In utero infections, such as CMV, herpes, rubella, syphilis, toxoplasmosis
