

APPENDIX

Metabolic and Bariatric Surgery (MBS) for the Treatment of Obesity

Emmi Solutions provides web-based shared decision making tools designed for patients to view at home or in the office. Each video takes approximately 20 minutes to view. The content includes a discussion of evidence-based treatment options and risks and benefits. Patients are better informed of the treatment options and preferences and bring that knowledge to their clinic appointment.

To view the *EMMI® Solutions Bariatric Surgery* decision tool, go to viewemmi.com and enter the following information:

- Code: IMHC
- Register (if required)
- Select: *Bariatric Informed Decision Making*
